

GROUP WORK: NSTP (CWTS 1) GROUP 2

Social Issues to your community

So we the group 2 have gathered all the issues of our barangay, and here are the similarities:

Waste Management - Our barangay struggle with improper waste disposal, leading to clogged drainage systems and environmental pollution, which exacerbates flooding and health risks.

Poverty and Unemployment - While some units or areas in our barangay are economically developed, there are some parts of the town that often face high unemployment rates and lack access to economic opportunities, perpetuating cycles of poverty.

Infrastructure Issues - Our barangay lacks some infrastructures that are widely needed by the public, especially in concern of roads and lack of public facilities.

Health and Sanitation - Our barangay lacks more access to clean and suitable water, proper sanitation, and adequate healthcare resources. With these lacking, it could lead to a vulnerability to diseases.

Double parking- an issue faced in our barangay. Reckless home owners park their cars on the side of the road creating problems for people using the road.

Overpopulation- Our barangay struggle with the insufficient funds because of overpopulation, some of the resources that the barangay gives to the community isn't enough

Teenage pregnancy- Young parents will be forced to work and stop school. Young mothers face health problems, and they often struggle to find stable jobs to feed their family.

GROUP 2:

- Alfonso, Jelyn
 - Bagas, Josh Gerard
 - Burnett, John David
 - Mallari, Vian Euclid
 - Rivera, John Jose
 - Timbol, Steven
 - Toledano, Joaquin
