

THEOLOGY REFLECTION PAPER

(ANG BIBLE SA NAGBABAGONG PANAHOON)

The extensiveness of the revelation at the Bible Conference was a true blessing for considering the spirituality and profoundness of the messages of scripture. Among the perceived benefits, it was established that frequent application of Bible helps in enhancing our faith association. Participants described their own experiences of how scriptures serve as referrals when facing life problems. The conversations also underscored that while the Bible is a book of history, it also has things to say about what is happening to us today. The scripture can give direction whenever one gets lost or stuck due to one reason or the other. Some insights concerned the main content of the books that offers hope in difficult times of people's lives. I felt connected with the other members at the conference because it is always helpful to hear how others interpret information. Consequently, participants found out that reading the Bible with others can improve group comprehension and spiritual practice. Altogether, the conference reassured that the Bible is the manual people rely on and derive power from during difficult situations as well as a source that provides knowledge about life that is timeless. Lastly, incorporating scripture into our lives can change our views leading to better ways of dealing with adversities by renewed stench. Reading "Ang Bible" which is the Taglish version of the bible, really makes it easier for the generation today to understand the passages and the word of God. The new generation can relate to these words since they are used 24/7 in today's era. It has impacted my journey through showing humility and integrity to my fellow community. I'd love to share bible stories and passages to my family and friends, it makes me feel better about myself. "Ikaw and pinaka-gwapo sa lahat ng lalaki, magandang salita ang lumalabas sa iyong labi, kaya forever kang bine-bless ng Diyos" -Psalms 45:2 is the bible verse that I can truly relate to. The verse boosts my confidence, it makes my insecurities go away.
